

## SUSTAINABILITY STATEMENT

---

The area of sustainability is attracting ever increasing levels of market attention and awareness.

Muraflex recognises that many of our processes, products and services have the potential to positively impact the environment and contribute to its benefit.

We recognise that the area of sustainability is constantly evolving and as a result we ensure that our practices and procedures always consider the environment first.

Muraflex is committed to constantly improving its environment we make it known and operate accordingly via our employees and suppliers, we encourage all initiatives, either individual or collective to make a difference.

We contribute to sustainable development by developing reusable elements that can be an environmental alternative to drywall, non-reusable.

Our focus lies in the areas where we can have the greatest impact: Product development & sourcing, packaging, waste & recycling, distribution & transport.
